Wireframes and UI/UX Designs

Stage 1: Drafts and Wireframes

The client requested a new webpage added to the website to display a list with descriptions of upcoming workshops and appearances in Fall 2016. Drafts were made based on decisions on how to layout the page elements that include the photograph, list of workshop dates, calendars, testimonials and workshop descriptions. Low-fidelity wireframes were done as pencil and pen drawings on paper, and in Adobe InDesign.

Wireframes and UI/UX Designs

Stage 2: UI Design Drafts and Wireframes

The client requested a new webpage added to the website to display a list with descriptions of upcoming workshops and appearances in Fall 2016. Drafts were made based on decisions on how to layout the page elements that include the photograph, list of workshop dates, calendars, testimonials and workshop descriptions. Several UI design drafts were produced and reviewed in the process. Comprehensive layout drafts were created in Adobe Photoshop CS6.

## Completed Workshops Webpage

Stage 3: Completed Workshops webpage

After several revisions and drafts in Photoshop and in the content management system with responsive design principles applied and tested, the final user interface design was decided and published to the world wide web. Web technologies used to create the webpage are HTML5, CSS3 and Bootstrap in CMS Made Simple™.

Workshop page in web browsers
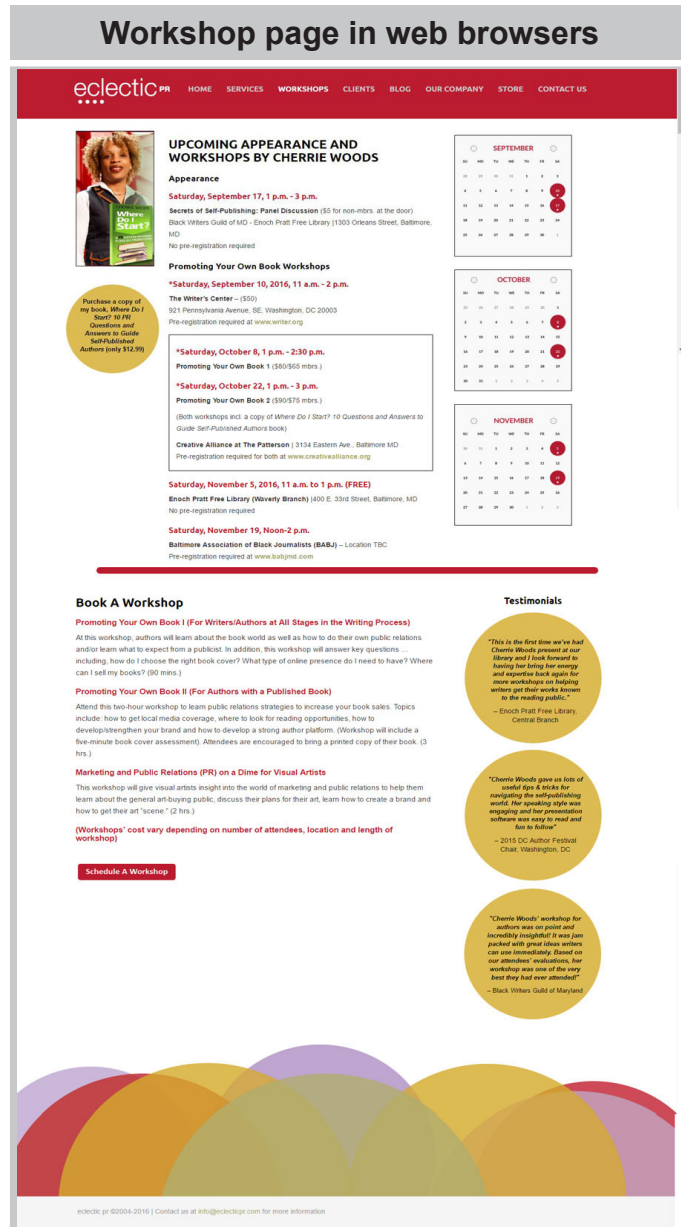

Workshop page in tablet device (iPad)
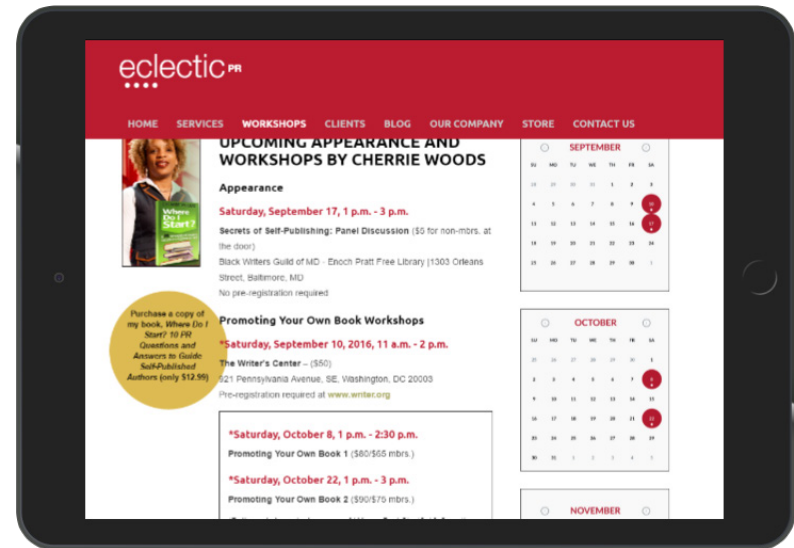

Workshop page in smart phone (iPhone)

Top **Middle** **Bottom**
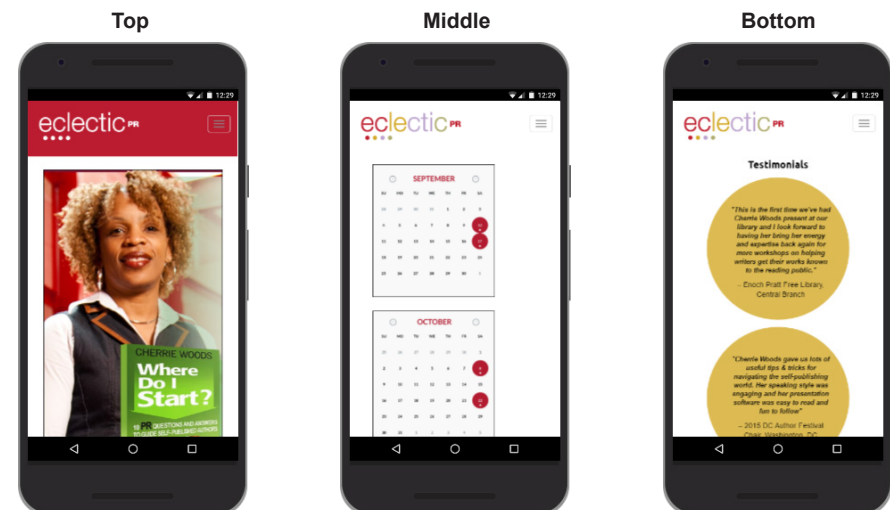

Note: Another option was considered and tested to use JavaScript / JQuery to make the calendars interactive and/or as popup calendars.
